SOLAR-TERRESTRIAL RELATIONS AND PHYSICS OF
EARTHQUAKES PRECURSORS

VII INTERNATIONAL CONFERENCE

v. Paratunka Kamchatsky kray
29 august – 2 September 2016
REPORTS COLLECTION

Petropavlovsk-Kamchatsky
2016

Preface

Reports contain the results of original research of physical processes in the different layers of the atmosphere, near space and the solid Earth. The questions of influence of solar activity on the magnetosphere and ionosphere of the Earth are discussed. Modern methods of measurement, processing and exchange of geophysical data are represented.

Key words: physics of atmosphere, magnetosphere, geophysical fields, earthquake precursors.

Conference was hold under Financial Support of RFBR (№ 16-05-20521 Г)

Scientific committee

Shevtsov B. M., Professor, Chairman, IKIR FEB RAS, Russia
Marapulets Y. V., Professor, Vice Chairman, IKIR FEB RAS, Russia
Nagatsuma T., Doctor, NICT, Japan
Holwartz R., Professor, University of Washington, USA
Bogdanov V. V., Doctor, IKIR FEB RAS, Russia
Kopylova G. N., Doctor, KB GS RAS, Russia
Mandrikova O. V., Doctor, IKIR FEB RAS, Russia
Marichev V. N., Doctor, Institute of Atmospheric Optics SB RAS, Russia
Bulgakova V. B., Ph.D., IKIR FEB RAS, Russia
Cherneva N. V., Ph.D., IKIR FEB RAS, Russia
Vodinchar G. M., Ph.D., Secretary, IKIR FEB RAS, Russia
