The challenge is big, but our goal is simple: **to achieve a sustainable energy future for Europe.** Innovation is the solution. New ideas, products and services that make a real difference, new businesses and new people to deliver them to market.

At InnoEnergy we support and invest in innovation at every stage of the journey – from classroom to end-customer. With our network of partners we build connections across Europe, bringing together inventors and industry, graduates and employers, researchers and entrepreneurs, businesses and markets.
