

Foreword

On behalf of the organizing committee of the 2018 4th International Conference on Energy Materials and Environment Engineering (ICEMEE 2018), I would like to express a warm ‘Thank You’ to all the participants, for their important contribution, they brought to the Conference! I strongly appreciate the contribution of the authors, who submitted valuable papers and agreed to do successive revisions of their papers, following the recommendations received from the reviewers.

The aim of the ICEMEE 2018 Conference was to bring together experts in energy materials and environment engineering, in order to exchange ideas and make new connections to extend and develop partnerships between the researchers from all the world.

We received more than 350 articles, which were peer reviewed by the International Scientific Committee or reviewers and they were also cross checked for similarities, for good scientific practice in publishing. Only 169 articles are accepted for publication in the ICEMEE 2018 Proceedings.

This conference provides an excellent opportunity for everyone involved to learn and discuss about sustainable development and green technology to the following areas:

Environmental Science and Environmental Engineering

Material Science and Technology

Water Conservancy and Civil Engineering

Energy Engineering

Many thanks to the members of the Scientific Committee and reviewers, who accepted to do the reviewing free of charge, which spent their time and effort to bring a substantial contribution to the ICEMEE 2018 Conference, by providing professional evaluation of the papers and suitable recommendations.

My partners have done their best and without their excellent work it would have been impossible to organize this event. Thank you very much to the Organizing Committee!

We have received excellent feedback up to now, from all the participants, saying they will be having fruitful scientific activities and they will spend enjoyable days, during the ICEMEE 2018 Conference!

Prof. Mohamed M H Mostafa
Chairman of ICEMEE 2018 conference
