

Dear colleagues,

We are happy to present the proceedings of the International Symposium "SUSTAINABLE ENERGY AND POWER ENGINEERING", which was held on 18-20 February 2021.

SUSE-2021 was aimed to demonstrate prospects, discuss scientific and practical studies, and became a platform for discussing the main challenges faced by the energy sector of the economy. During SUSE 2021, we successfully had the First meeting of the Russian-Kazakh Consortium of Technical Universities (RKCTU).

Scientific review of the articles in the proceedings was conducted by an international scientific committee, which includes respected scientists from Russia, Kazakhstan, Serbia, Mongolia, Azerbaijan, Belarus, Uzbekistan, Kyrgyzstan, Bulgaria, Slovakia, Tajikistan and Czech Republic.

We believe that you will enjoy the reading and hope to see you at SUSE 2022!

All the best,
SUSE 2021 organizers
