About the conference

The conference was held to summarize international experience in the field of energy, ecology and agriculture. The conference presented scientific research aimed at solving a range of problems in the field of sustainable development, namely:

- Development of scientific and practical potential in order to formulate proposals for the introduction of high-tech technologies in the energy sector;
- Popularization of fundamental and applied research in the field of agriculture, green energy, ecology and environmental management, mining technologies and soil cultivation;
- Formation of recommendations aimed at improving computer models, information technology, engineering, innovative and digital technologies in agriculture, environmental protection and green energy.

The main directions of the conference:

1. Energy, problems of the fuel and energy complex and Earth Science;
2. Ecology and environmental protection;
3. Engineering and technologies in agriculture.

The conference editors express special gratitude to the conference organizers, members of the program committee, authors of articles, reviewers, conference participants and the EDP Science Team for the opportunity to publish the conference proceedings.
