

Conference: Green Horizon 2024: International Forum on Energy Management, Ecological Innovation, and Agro-Industrial Practices (YIFHG 2024)

16-18th of June 2024, Zhengzhou, China

Conference Organizer:

North China University of Water Resources and Electric Power (Zhengzhou, China)

Conference Partners:

National University of Singapore (NUS), Singapore - Recognized for its research in sustainable energy and digital technologies

Indian Institute of Technology Bombay (IIT Bombay), India - A leader in renewable energy and environmental engineering.

Tsinghua University, China - Has a significant research focus on renewable energy sources and environmental sciences.

University of Melbourne, Australia - Offers comprehensive programs in climate change and natural resource management.

King Abdullah University of Science and Technology (KAUST), Saudi Arabia - Focuses on pioneering research in energy production and distribution.

Overview:

Green Horizon 2024 is an international forum dedicated to advancing global understanding and collaboration in the fields of energy management, ecological innovation, and sustainable agro-industrial practices. This prestigious event brings together thought leaders, researchers, policymakers, and industry professionals from around the world to share insights, breakthroughs, and strategies aimed at fostering sustainable development across key sectors of the global economy.

Topics:

Green Horizon 2024 warmly invites the global academic and professional community to contribute to our interdisciplinary conference. We seek pioneering research papers that offer fresh perspectives and solutions in sustainability and technological innovation within the following thematic areas:

1. **Advancements in Renewable Energies and Efficiency Technologies:** Explore the latest in renewable energy sourcing and breakthroughs in energy-saving measures.
2. **Innovations in Energy Systems:** From novel methods of energy production and smart distribution networks to advancements in storage technologies.
3. **Sustainable Agricultural Practices and Agro-Industrial Developments:** Research on enhancing sustainability and technological integration in agriculture and the broader agro-industrial sector.
4. **Climate Science and Resource Management:** Insightful studies on climate adaptation strategies and the sustainable management of natural resources.
5. **Environmental Science Innovations:** Contributions to the understanding and preservation of ecological systems through cutting-edge research.
6. **Tech-Driven Environmental and Resource Management:** The role of information technology in revolutionizing ecology and resource management.

We deeply appreciate the organizers, program committee members, and reviewers of Green Horizon 2024 for their hard work, which was essential for the event's success and the quality of the conference papers. We also thank the authors for their valuable research contributions.

A special thanks to the Web of Conferences team. We look forward to future conferences together.
