International Process Metallurgy Conference (IPMC) is a scientific forum that brings together participants from across the globe to share the latest advancements, knowledge, and innovations in metallurgical processes, and to foster the use of best practices. The conference aims to strengthen networks and synergies among industry practitioners, academics, researchers, and policymakers involved in the metallurgical industry, enabling fruitful collaborations and driving technological advancements.

### Topics
- Geometallurgy
- Pyrometallurgy
- Hydrometallurgy
- Biohydrometallurgy
- Electrometallurgy
- Alloy Metal Design
- Surface Treatment
- Casting, Forming and Machining
- Metal Recycling and Waste Management
- Corrosion and Degradation of Metals

### Keynote Speakers
- Prof. Eddy Agus Basuki
  Institut Teknologi Bandung, Indonesia
