

Preface

This proceeding includes original and peer-reviewed research papers from 8th International Symposium on Resource Exploration and Environmental Science (REES 2026), which held on June 25-26, 2026 in Ordos, China.

The REES 2026 conference had four main topics: 1). Resource Exploration and Utilization, Geography and Geological Engineering; 2). Environmental Engineering and Sustainable Development; 3). Resources and Energy, Power Engineering; 4). Environmental Chemistry, Environmental Bioengineering and Related Technologies. REES conference is a platform for presenting excellent results and new challenges facing the field of earth and environmental sciences, resources and environmental engineering, energy and electricity engineering and related topics. It brought together experts from industry, governments and academia, experienced in engineering, design and research.

REES 2026 received 73 manuscripts, and 19 submissions were accepted for full-text publication, and 32 one-page abstracts were invited as oral presentations. By submitting a paper to REES 2026, the authors agreed to the review process and understood that papers undergo a peer-review process. Manuscripts were reviewed by appropriately qualified experts in the field selected by the conference committees, who gave detailed comments and-if the submission was accepted the authors would submit a revised version that took into account this feedback. All papers were reviewed using a double-blind review process: authors declared their names and affiliations in the manuscript for the reviewers to see, but reviewers did not know each other's identities, nor did the authors receive information about who had reviewed their manuscript. The Committees of REES conference invested great efforts in reviewing the papers submitted to the conference and organizing the sessions to enable the participants to gain maximum benefit.

Hopefully, all participants and other interested readers will benefit scientifically from the proceedings and also find it stimulating in the process.

With our warmest regards,

Conference Organizing Committees
Ordos, China
